
Iced Hot Cocoa

1 cup milk

Hot cocoa mix

6-8 ice cubes (or 'chocolate ice cubes')

- ❶ Decide if you'll be using regular ice cubes or chocolate ice cubes. This will determine how much cocoa mix you need.
- ❷ With Regular Ice: Double the manufacturer's recommended quantity of cocoa or hot chocolate mix.
- ❸ With Chocolate Ice: Use a single serving recommended for your favorite cocoa or hot chocolate mix.
- ❹ Make Iced Hot Cocoa: Stir the drink until you see no more chunks of powder. Add the milk in a slow, steady stream while stirring to avoid clumping.
- ❺ Put the cocoa or hot chocolate mix in a glass. Slowly stir in the milk or milk alternative. When the mixture is smooth, add the ice cubes of your choice.
- ❻ To make Chocolate Ice Cubes: Whisk the hot chocolate or hot cocoa mix with one cup milk. Pour the mixture into an ice cube tray. Freeze overnight, or until solid.
